## About This Game

**Lootbox Lyfe is a hardcore Metroidvania Platformer with Idle Game elements and satirical comedy.**

You play as Liam Cappello, a cunning human who has been transported to a 2 dimensional world once ruled by 4 dimensional beings. Your goal? To rid this world of the grief caused by the existence of Lootboxes. To restore the balance to this alternate world you must destroy Shadowleaf Irvine's (the bad guy) giant golden Lootbox that lies in his trap-filled lair.

With magnificent art by Jonathan "Dulcahn" Dodd, whimsical music by Kimmo Savilampi, and punchy sound design by Roman Ramirez, there is no shortage of talent putting together this lootbox-popping experience.
