Another good expansion. It's new elements aren't as revolutionary for the game as Skullport's - but the changes and additions do make the game more interesting, without being as complicated or risk-taking as the other expansion.

What they added:

*Some of the new Quests have rewards upto 40VP, and some have more variable costs and rewards (making things a little more flexible). Some of the quests have very costly but powerful rewards (e.g. putting ever available building immediately into play under your name).

*A lot of buildings and Intigue cards now ask you to place workers onto action spaces on top of other rewards. The strategy behind this is interesting - do you use the workers to entice other players onto your buildings so you get the rewards, or do you try and stack them onto buildings you want so you can get extra resources - and hope no one jumps at the extra free workers?

Summery. It's a less dramatic but easier to learn expansion than Skullport. Either expansion would greatly enhance the game, pick this one if you want a less dramatic or more easily adapted experience.

8V10. A nice little puzzle game. There are many pros, but I find that talking about the cons would be a better selling point. For example, lots of backtracking between the years with a very maze like map, at least to me. It's like memorization. Annoying, but still fun. I wasn't a very big fan of the platforming aspect of it, but that's mostly because I suck at platforming in general. It took me literally like 5 minutes on average to beat each stage. Awful, isn't it? Overall, though, it was a very fun little game, and the objectives weren't really that hard to find. A definite casual, which I like, because I suck at gaming in general. I highly recommend this one.. If you want to see a glitchier peg solitaire, this is your game.. This is an unfinished 3D third person brawler/combat game with no single player mode and no players. I'd write more about the gameplay but the game stopped accepting input after I switched it to full screen.

Another reason why the Early Access badge in Steam should be taken to read "Do not buy this." Early Access is worse than pre-orders. At least with pre-orders, developers have to finish the game before they get paid. This guy just took the money and ran.. One of the best looking indie game I ever played! Even on low settings!. Sure, the game is only \$2, but it feels like it's charging you to play something that was a student project in Game Design 101 (if I was the professor, I would've given them a C-).

The graphics are too poor to be scary (but the game tries anyway), the goals are not entirely clear, and gathering batteries is more annoying than it is suspenseful.

If you're still morbidly curious, you can check out a video of my experience:

https://youtu.be/VzaqxYdaT8A?list=PL9EvvZhmTIs6NPNae9Yy3bbw1_m34I_XP. [how to improve the game:](#)

[Adds](#)

[pay youtubers to record on the game](#)

[add more graphics options](#)

[add First person](#)

[add an option for low-end pc maybe?](#)

[add more costumizations](#)

Continually crashes and restarts, but the crashed app doesn't close, it just hangs, eating up system resources.

When it works, it works OK. "When" is the important word, however; more often than not after 2-3 minutes of play the controller will cut out and require re-sync with the adapter. In the end, I've given up using my Xbox One Elite controller on my Steam Link, and I'm keeping it hooked up to my PC on my desk. Instead I am using a regular Xbox One controller connected via Bluetooth to my Steam Link.

Utterly useless.. I am not very impressed about this story. There is the talk about the ways for a split soul. But this game doesn't give you any options. There is one part playing a depressed young man. But you don't play him. You can only confirm playing a useless game on his laptop or talk to a very few npc's.

The other is an old warrior with even less options. Oh, at last he can fight. But the fights are boring.

There is just not enough to do in this 'game'. Add that most npc's don't talk, that some conversations are not translated and that the end is very very bad (with a hint that they want to sell the next part) and I can't recommend this 'game' even for the low price. This game is fun but become complicated after some hours of playing, overall its a great game for all the trading possibility and the sea battles.

Easy to handle but hard to master, and once you are well expanded it could give you headache to set trading route and manage all your colony.

A lots of detailed ships, possibility to have lots of fleet for trading or battle and possibility to set some automated trading road, exactly like you want them.

Nice graphic both on the map and during sea battle.

The diplomacy is well done, so you can directly trade some material with the other nations, ask anyone to start/stop doing war and things like that.

You need money to rules safety, and it's fun to make the mission, (better with the DLC).

Still having a lots of fun trying to get the achievement and playing the tactical sea battle.

9/10. I'll preface this by saying, this game is short.

It only took me about an hour to "get through" this game but I can honestly say I will be thinking about it for hours afterwards. It took me to a similar place most good books and movies take me. An introspection that I can't quite shake while it's driving me to seek out answers.

In laymans terms. This game is more of an experience and story than most games. If you want to be drawn in I highly suggest it.. You get what you paid for, 1K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.. Its a very good game with a good concept BUT THE PROBLEM IS I CANT FIND A GAME

. im very disappointed with this game, i will admit that the graphics an the whole concept of the game is ...that is when an if your able to see anything. the game is incredibly dark, to dark to even know what your looking at, or know if your stuck in a corner tryin to move forward lol all in all, i thought it had potential, but couldnt see anything else to rate it any other way
